The Business Value of Automox Patch and Endpoint Management Software

IDC's study demonstrates how study participants have used **automated patching and endpoint management with Automox** to **reduce the manual effort associated with patching, better ensure patching coverage, and improve the performance and security of the devices** used every day by their employees.

KEY RESULTS

$230,400
average annual benefits per 1,000 end points/devices

362%
three-year return on investment

4-month
payback on investment

PATCHING BENEFITS

- **96%** more patches automated
- **128%** more software titles covered for patching
- **65%** fewer patching errors
- **74%** more efficient patching staff activities
- **280%** more patches applied per FTE
- **65%** faster completion of patches

CUSTOMER QUOTE:

"What attracted us most to Automox were its automation capabilities. We've gone beyond just Windows patching and now use the auto-patch-all policy to meet our broader patching goals."

TROUBLESHOOTING AND SECURITY BENEFITS

- **49%** faster to troubleshoot device-related issues
- **56%** more efficient troubleshooting teams
- **44%** more efficient security teams
- **$56,300** security tools savings per organization per year

CUSTOMER QUOTE:

"Quick patching with Automox reduces our attack score, which is crucial for reputation risk. For new company onboarding, we simply deploy the Automox agent, and they receive our predefined policies. This makes endpoint management easier and ensures healthier endpoints through automatic patching."
